**Introduction of the New C22  
Chain-Drive Transmission**

Continuing our innovations and product enhancements, Waterous introduces the new C22 Chain-Drive Transmission that will replace the current C20 Chain-Drive Transmission on orders beginning January 1, 2023. The C22 Generation allows for Waterous pumps/transmission configurations to fit into medium-duty type apparatus. Other features and enhancements are listed below:

**Features and Enhancements:**

- Smaller size fits between medium-duty chassis frame rails
- Increased shaft torque rating: Increased from 16,000 to 19,000 ft-lbs
- Higher driveline speed capability using high-speed ball bearings
- Robust housing and improved structural integrity
- Improved mounting application of primer – angled at 8 degrees to improve draining
- Electronic tachometer option is not available.
- Interchangeability between the C20 Transmission using the same chain widths, ratios and drops
- Optional transmission oil cooler kit
