

Waterous Fire Pumps - Water - It's not just in our name, it's in our DNA

Waterous has talked a lot about providing fire pumps to the largest cities in the USA. We also pride ourselves in being in the largest cities to our friends to the North, Canada. While we talk about large cities, we also cover the USA from coast to coast from the smallest townships in South Carolina to the mountains of Colorado and westward to the Pacific Ocean state of California. Waterous not only blankets the United States and Canada, we are a world-wide company with fire pumps in China, Indonesia, Australia, Peru, Colombia, Brazil, Chile, Argentina, Mexico, South Africa, Cyprus, Saudi Arabia, Taiwan, Russia, Italy, Croatia, Romania, Poland, Vietnam and many more. Why Waterous? They can trust us.

Waterous purchases castings from foundries in the USA, and in our factory, machines castings and other raw stock material into gears, impeller shafts, coupling shafts and other parts that make up a fire pump. Why is this important? Waterous can control our quality internally, we are not subject to international issues that may create delays in castings and parts, we can provide you with answers on orders by visiting the factory (located in the same building as our offices) and it keeps jobs for hard-working people.

To bring you the highest quality fire pumps on the market today, Waterous continually invests in its people and machinery. Recent purchases of robots, machining centers and critical measurement devices, Waterous assures you that our pumps are made to strict standards, standards that are required to meet and usually exceed NFPA Standards.

Waterous not only builds fire pumps, we have been the leader in Compressed Air Foam Systems for over 20 years starting with the ECLIPSE in 1996. Today, we continue to enhance and add products to our CAFS line to meet the demand of the firefighter. Waterous also serves the ARFF, Wildland/Urban Interface, Industrial, High-Rise Fire Fighting and Decoking/Descaling industries with products that meet the critical demands of these rigorous environments.

With over 138 years of manufacturing experience, Waterous brings you the quality you deserve, the performance you demand and the support you need. Water - It's not just in our name, it's in our DNA.
