

**TECHNICAL BULLETIN
No. 0128**

**ONE STEP CAFSYSTEM DISCONTINUED /
INTRODUCTION OF ECLIPSE® GEN 2.0
CAFSYSTEM**

Effective January 3, 2018, the ONE STEP™ CAFSystem will be discontinued and the new ECLIPSE® GEN 2.0 CAFSystem will be offered in its place.

All orders received for ONE STEP™ CAFSystems will automatically be changed to the new ECLIPSE® GEN 2.0 CAFSystem.

Why the Change?

- Entire ECLIPSE® Gen 2.0 CAFSystem is **designed and engineered** by Waterous.
- Better air/solution mixing creates superior foam. All mixing takes place in the patent-pending **Foamulator**.
- To make customer interaction easy, Waterous Engineering made the **Tellurus** control panel operate the same as (color and name change) the discontinued ONE STEP™ CAFSystem panel.
- Available as a vehicle-mounted pump/compressor 150-ECL model equipped with a CX, CS, CM or HL pump, Aquis™ 3.0 Foam System, 150 sCFM Rand air compressor and three FOAMULATORS.
- Available in modular slide-in configurations with Waterous CPD-2 pump, 50 or 100 sCFM compressor, diesel engine, Aquis™ 1.5 Foam System and two FOAMULATORS.
- HIGH FLOW Version – Standard FOAMULATOR will allow high flows for monitors.
- HIGH RISE Version Available.

For more information, please refer to the Waterous Web Site at www.waterousco.com and look for ECLIPSE® CAFSystems.
