

WATEROUS PRODUCT SPOTLIGHT

Waterous over the past 127 years continues to produce high quality products for the fire service. Below we highlighted a few products that not only lead the industry in innovations but provide the fire fighter with the most advanced weapons to fight the toughest of fires.

CSC20 / CSUC20

Designed with a two-piece, horizontally split body with intake and discharge passageways in a single casting and on the same level. This design provides the lowest possible height, a lower center of gravity, and more room for hose reels, hose beds and other equipment. The CS/CSU Split-Shaft model is equipped with a chain-driven C20 Transmission. The C20 Transmission provides the best In-Class power transfer. The silent chain-drive provides no gear whining, provides positive shifting and requires less horsepower that will enhance the efficiency of the apparatus.

S101C20

Get the power and performance of a traditional midship fire pump in a compact, lightweight design. Made of ductile iron, the S100 are nearly 35% lighter, and yet 25% stronger than identical pumps made with gray iron. Available as a direct-engine mount or matched with a Waterous aluminum case transmission.

The S101 Split-Shaft model is equipped with a chain-driven C20 Transmission. The C20 Transmission provides the best In-Class power transfer. The silent chain-drive provides no gear whining, provides positive shifting and requires less horsepower that will enhance the efficiency of the apparatus.

Aquis™ Foam Proportioner

It's not easy to properly proportion fire-suppressing Class A foam. To get the ratios right, you need to compensate for a number of variables. Doing so demands world-class engineering coupled with dependable flow meter technology. In other words, you need The Aquis™ Foam Proportioner from Waterous. It delivers a level of performance and reliability typically reserved for more expensive Class A foam proportioners.

150-OS ONE STEP™ CAFSYSTEM

When it comes to compressed air foam systems, nothing can match the ease of use of the ONE STEP™ CAFSystem. ONE STEP incorporates a powerful integrated midship-mounted air compressor system and revolutionary compact foam generators to provide a reproducible homogenous, micro-cellular, continuous bubble stream. A characteristic of each ONE STEP™ CAFSystem is the pre-set flow rate and pre-set pressure for water and air. The operator does not have to adjust flows and pressures.

Eclipse™

Used by more fire departments around the world than any other CAFSystem, the Eclipse™ CAFSystem from Waterous is easy to operate, incredibly efficient and a proven performer. The Eclipse™ CAFSystem buttresses your attack capabilities with big flow rates up to 2,250 GPM, high pressure up to 150 PSI and impressive suppression results.
